OBJECTIVE

Motivated student developer with hands-on experience in web development, backend/frontend coding, and academic mini-projects. Seeking opportunities to apply technical skills and creativity in building impactful software solutions.

EDUCATION

Bachelor of Science in Computer Science

[Your College Name], Belgaum

Expected Graduation: [Year]

TECHNICAL SKILLS

- Programming: Python, PHP, JavaScript
- Web Development: HTML, CSS, Flask
- Databases: MySQL
- Tools: GitHub, Arduino troubleshooting
- UI/UX: Navigation design, responsive layouts

PROJECTS

IgniteHub

- Developed a platform with global search and dark mode features.
- Focused on UI/UX polish and interactive navigation.

Visitor Counter

- Built a web-based counter application with backend integration.
- Implemented real-time updates and clean design.

Student Record Sorter

- Designed a system to manage and sort student records.
- Applied database queries and efficient algorithms.

EXPERIENCE

Academic Mini-Projects

- Led multiple coding projects from setup to deployment.
- Hands-on troubleshooting with deployment and file management.
- Collaborated on backend/frontend development tasks.

ACHIEVEMENTS

- Successfully deployed portfolio site on GitHub Pages.
- Rapid iteration and enhancement of real-world projects.
- Recognized for methodical problem-solving and persistence.

HOBBIES & INTERESTS

- Coding and web development
- UI/UX design and modern navigation - Arduino projects and hardware troubleshooting
